I am interested in developing my art in Armenia as it is a country with a peculiar history and a strong sense of identity.
I will focus of portraiture and I would like to create a relationship with local population and explore how the differences in human and physical geography affect individuals cultural identity.
The residency at ACOSS would help me to expand the portfolio of countries I have worked in, broadening my experience as fine artist who combines different genres of photography. </p><p align="justify">Please find attached with this application a selection of 10 images of my work.
